

## Double Glazing Comes To The Rescue Of Timber Floors

With new energy legislation now in force throughout Australia timber sub floors have come under fire with their level of performance impacting on the achievement of the required ratings. However there is a product that will help achieve the required rating and that is “**Double Glazing**”.

In many cases it is more cost effective and appropriate to use timber sub floors such as low lying, flood prone areas and sloping sites; it is also aesthetically very attractive and is a product that is desired by the consumer.

With new energy legislation now in force throughout Australia timber sub floors have come under fire with their level of performance impacting on the achievement of the required ratings. However there is a product that will help achieve the required rating and that is “**Double Glazing**”.

In many cases it is more cost effective and appropriate to use timber sub floors such as low lying, flood prone areas and sloping sites; it is also aesthetically very attractive and is a product that is desired by the consumer.

The good news is there is no need to get rid of the good old timber floor, just use a timber floor in conjunction with “**Double Glazed**” windows and your home will be energy efficient and achieve or exceed the required standards.
