NEW VERTICAL PARKING OPTIONS WITH THE EV3R SERIES.

Post Mount - pre drilled for single or double sided use, and with offset heights.

E3VR-P
SINGLE + DOUBLE SIDE OPTIONS

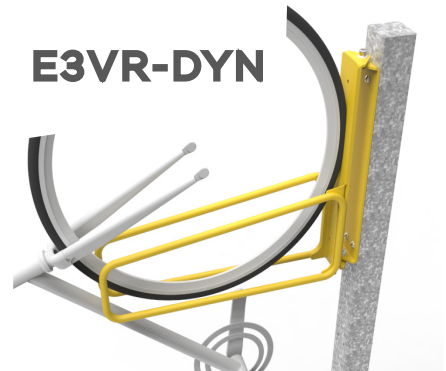

**USER
FRIENDLY,
ATTRACTIVE
+ BIKE SAFE**

Rack options for bikes with or without fenders. User friendly, attractive and bike safe.

Space saving angled parking - reduce bike space by 30%

Dynamic - increase bike capacity by 20% allowing users to pivot the rack left or right.

NEW DOUBLE TIER PARKING OPTIONS WITH THE E3DT SERIES.

Increase bike capacity by 120%

E3DT-GT

A Dynamic upper tier combined with a dynamic lower tier provides the maximum capacity possible.

- Upper tier includes gas assist lift for ease of use and is available in alternating heights.
- Lower tier uses the E3GT ground tier rack that allows users to move the rack in/out for ease of access, and is available in alternating heights.
- The E3GT is also available separately as a dynamic single tier system for a 20% capacity increase.

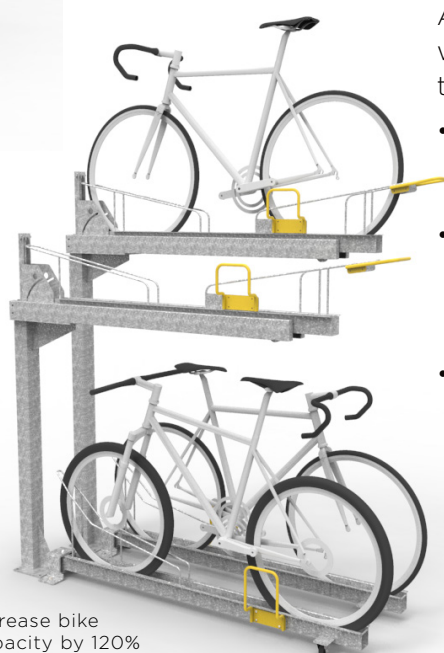

Increase bike capacity by 100%

E3DT-CBR

A Dynamic upper tier combined with a static lower tier provides the most cost effective option to increase capacity by 100%

- Upper tier includes gas assist lift for ease of use and is available in alternating heights.
- Lower tier uses the CBR bike rail.

Increase bike capacity by 120%

E3DT-GP

A Dynamic upper tier combined with a dynamic lower tier provides the maximum capacity possible

- Upper tier includes gas assist lift for ease of use and is available in alternating heights.
- Lower tier uses the E3GP bike ground pivot rack that allows users to move the rack left or right for ease of access.
- The E3GP is also available separately as a dynamic single tier system for a 20% capacity increase.

CBL SERIES SHIPPED FLAT PACKED + DESIGNED FOR QUICK + EASY ASSEMBLY.

CBL-DT

Increase capacity by 100%

A double tier locker provides a Security Level A parking facility for 2 bikes and achieves the maximum capacity possible in a given space. Select from several locking options. Available in galvanised or colour powder coat.

CBL-1

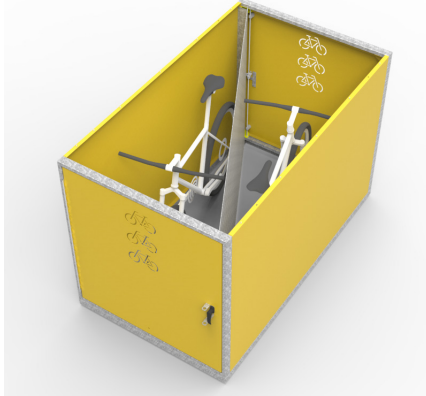

Security Level A.

A single door locker that provides the highest security Level A parking facility for 1 bike. Select from several locking options. Available in galvanised or colour powder coat.

CBL-2

Cost-effective 2 door locker.

Two doors and a secure divider provide Security Level A parking facilities for 2 bikes. This is the most cost-effective option per bike space. Select from several locking options. Available in galvanised or colour powder coat.

CBL-V

Space saving vertical locker.

A single door vertical locker provides a space saving Security Level A parking facility for 1 bike. Vertical parking reduces the horizontal footprint required for tight spaces. Select from several locking options. Available in galvanised or colour powder coat.
