Decking and Screening pre-oiled to last longer

Thinking about a deck? Think about pre-oiling it. You can't go wrong. In fact you may go wrong if you don't. Did you know that most decks fail because they have not been coated properly. We can pre-oil your decking timber prior to install. We have an oiling line set up specially to do such. All the decking that we oil is coated on every side to maintain stability and extend the life of the decking. It can be tinted or clear, the choice is yours. It's the most effective and efficient way to do it. You can sit back now and watch the world go by with peace of mind.
