Solid timber joinery doors

Highlands Timber Coating are to ones to turn to when you need a good quality solid timber joinery door. We can supply them in a large range of timbers and styles, perhaps the largest actually. We have a huge range of door hardware as well and can do a complete package. We are also the instigators of the ALL NEW LIGHT WEIGHT JOINERY DOOR. It comes only flat faced to meet the current trends and is about 35% lighter than a normal door. It looks the part, there is nothing to show on the outside that it is engineered, it looks perfect. End grain is visible along with side grain. Both are unaffected in appearance. It is SIMPLY STUNNING.
