

NASH STEEL-FRAMED HOUSING COURSE

NASH has developed a steel framing course for Builders, Carpenters and Frame Erectors in conjunction with Holmesglen and Gordon TAFEs.

The course covers:

- Introduction to steel framing
- Becoming a user of steel house framing
- Safe work practices
- Fastenings
- Subfloor systems and setting out
- Floor sheet installation and wall set out
- Wall frame erection
- Roofing requirements and set out
- Roof erection and bracing
- Eave and verge trim out, fascia/barges
- Window and door installation
- Internal and external lining
- Following trades, plumbing/electrical
- Plenary session/course evaluation

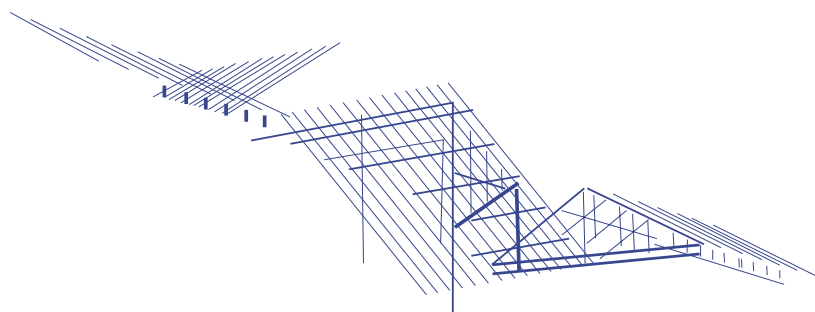

On completion, successful course participants will:

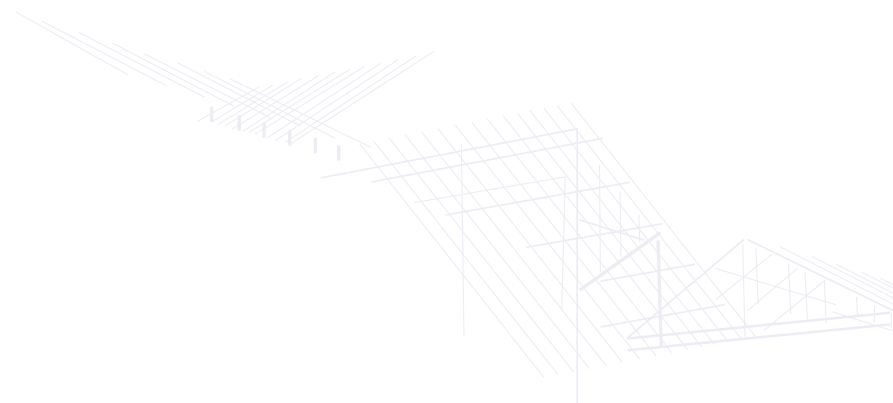

- have extended their skills to include steel-framed construction and finishing
- receive a Certificate of Completion.

Trades people with formal carpentry qualifications will receive a Statement of Attainment for the nationally endorsed competency standards:

- BCG3019A Erect steel wall framing
- BCG3018A Erect steel roof framing

Other successful participants may undertake a formal assessment against prerequisite competencies from the Certificate III in General Construction (additional fees apply) if they elect to gain the Statement of Attainment for the above competencies.

Duration	16 hours run over two consecutive days
Cost	\$250 (Additional costs will apply for a formal assessment of the pre-requisite competencies)
Dates	Courses are scheduled as follows subject to attaining a minimum of 8 participants (Maximum 10 participants per course)
